<b><u>Order Types and Parameters:</u></b>	
<u>Limit Price Order:</u>	This is an instruction where the investor specifies the price at which he is willing to execute the transaction or better. Meanwhile the broker is bound to record the order into the electronic trading system at this specified price.
<u>Market Price Order (MP):</u>	A market order is placed without a specified price, and is executed as soon as possible at the best available price.
<u>Orders Carrying Time Validity:</u>	An order carrying time validity is an instruction to the broker to perform a buy or sell within a specified period of time. It should be cancelled if not executed during the period fixed for its execution.
<u>Order according to other Investor instruction:</u>	This is an instruction to enable the investor to order his broker to trade according to a specified authorization granted thereto.
<u>Cross Trade</u>	It is an order contains both selling and purchasing of specific security with the same broker, at the same amount and in the same price for two different clients.
<u>Off-Order Book Transactions:</u>	OTC is not allowed.
